

Joshua N. Meeks

joshuameeks@unr.edu | (415) 530 7299

Education:

University of Nevada, Reno
B.S. Mechanical Engineering

Expected Graduation: December 2026

Experience:

Innovation Center [*Student Worker*] | Reno, Nevada

March 2024 - Present

- Automated the business data analysis for improved accuracy and time savings.
- Co-developed a new summer robotics camp for kids 4-8 years old.
- Applied for \$4000 in grants, sourced materials, recruited five volunteers and coordinated with other youth organizations to find instructors.
- Teach students to use machines such as lathes, laser cutters, and various woodshop tools.

Rocket EMS [*Engineering Intern*] | Carson City, Nevada

January 2023 – April 2023

- Programmed and automated circuit board assembly lines.
- Solved problems regarding misalignment in SMT pick and place machines.
- Coordinated manufacturing processes between the engineers and operators to ensure optimized production.

Acree Technologies [*Engineering Intern*] | Concord, California

Consecutive Breaks 2018 - 2023

- Assembled and programmed plc's to automate deposition chamber and produce reports.
- Used the Modbus protocol to communicate between LabVIEW on a master computer and Ladder Logic on plcs.
- Analyzed experimental coatings to refine production processes.
- Led fabrication and aided in the development of new deposition heads that halved production time.
- Operated various lab instruments such as profilometers and tribometers in clean room environments.

Organizations and Skills:

- Member of the Aerospace club; I coordinate with individuals and organizations to secure funding. Currently designing an altimeter system and helping with a motor test bed.
- SolidWorks CAD design associate (CSWA).
- Experience with 3D Printing, laser cutting, CNC mills and lathes, arc welding, etc.
- Excel Experience: Automation, Pivot tables, Macros, Dashboards.
- Experience with Finite Element Analysis in SolidWorks and COMSOL.
- Proficient in Ladder Logic, MATLAB, LabVIEW.
- I took a course covering GD&T principles, drafting standards, and manufacturing processes.
