

Joshua N. Meeks

joshuameeksenengineering@gmail.com | (415) 530 7299
<https://joshmeeks.github.io/>

Education:

University of Nevada, Reno
B.S. Mechanical Engineering

Expected Graduation: December 2026

Applicable Experience:

Digital Solid State Propulsion [*Engineering Intern*] Reno, Nevada

June 2025 – Present

- Designed fuel feed system for F-16 EPU Gas Generator test bed.
- Designed test stand power and signal distribution board and box with KiCad.
- Compostable training cartridges for military tank simulations.
- HAN based propellant system design and testing. AF-M315 Propellant systems.
- Custom positive pressure glove box for catalyst testing. Custom ABL Friction tester for propellants.
- Strand burn rate testing. Hot Fire Testing. MILSPEC experiment procedure creation.

Innevation Center [*Student Worker*] | Reno, Nevada

March 2024 – September 2025

- Automated business data analysis for improved accuracy and time savings.
- Co-developed a new summer robotics camp for kids 4-8 years old.
- Taught students to use shop machines such as lathes, laser cutters, and woodshop tools.

Rocket EMS [*Engineering Intern*] | Carson City, Nevada

January 2023 – April 2023

- Programmed SMT pick and place machines on circuit board assembly lines.
- Coordinated processes updates between the engineers and operators to optimize production.

Acree Technologies [*Engineering Intern*] | Concord, California

Consecutive Breaks 2018 - 2023

- Assembled and programmed plc system to automate deposition process.
- Used Modbus to have active communicate between LabVIEW on my computer and Ladder Logic on plcs.
- Analyzed experimental coatings with tribometers to refine production processes.
- Led fabrication and aided in the development of new deposition heads that halved production time.
- Lots of time spent overhauling vacuum chambers and various pumps; roughing, turbo, diffusion.

Organizations and Skills:

- Vice President of UNR Aerospace Club: Flight Computer, CNC PCB Mill, Toaster Oven Reflow Oven, Liquid Rocket Team, Thrust Stand Team, L2 Certification, Club Website. Safety Improvements.
- SolidWorks CAD design associate (CSWA), experienced with Creo, Onshape, KiCad.
- Experience with 3D Printing, laser cutting, CNC mills and lathes, arc welding, most shop tools.
- Experience with Finite Element Analysis in SolidWorks and COMSOL.
- Proficient in html (Website Creation), C++, Ladder Logic (PLC <3), MATLAB, LabVIEW (DAQ Systems).
